

COL127-S6R

108

This technical drawing shows a cross-section of a curved structural component. The component has a light gray shaded outer layer and a white inner core. A horizontal dimension line with arrows at both ends is positioned above the main body of the part, with the number '108' centered between them. The part features a vertical flange on the left side and a curved profile on the right. Two small rectangular features are visible on the right-hand curved surface.
